Date :2011-08-01 version 1 by Qian Wei Jun. Zhao Yunwei eds Integrated Electronic Design and Practice and analog electronic technology Digital Electronics SCM application of technology and other content materials closely. is to participate in vocational training at all levels of e-skills competition before basic materials. Integrated Electronic Design and Practice consists of seven items. Item 1 electronic production base of electronic components commonly used in the performance. function. classification. identification and detection methods. as well as some common types of hand tools. role. use the method; project design and production of the basic unit 2 analog circuits. commonly cited basic unit circuit design; project 3 digital circuit design and production. introduced by a few typical examples of commonly used digital circuit circuit; item 4 commonly used sensors and applications. commonly used in several sensor principles. characteristics and typical application circuit; item 5 around development board is designed with STC89C51 introduce common design and C51 microcontroller programming; Item 6 describes circuit design and microcontroller in Proteus system development in the application; Item 7 describes four previous cases the design of electronic design contest. Integrated Electronic Design and Practice can be used as automation. electrical engineering. electronic information. communication engineering. computers and other electronic materials class students. while electronic engineers and technicians. electronics enthusiasts also have a good reference value. Contents: 1.1 item 1 electronic production base of electronic components commonly used in the identification resistor 1.1.2 1.1.1 1.1.3 inductors and transformers. capacitors diodes 1.1.5 1.1.4 1.1.6 integrated circuit transistor and the use of assembly tools 1.2 1.2 Hardware Tools 1.2.2 .1 common thinking and practice of hand soldering tools to project design...
