

BEE

By Rose-Lynn Fisher

Princeton Architectural Press. Paperback. Book Condition: new. BRAND NEW, BEE, Rose-Lynn Fisher, Bee is a book of photographs in magnifications ranging from 10x to 5000x. Presenting views of the bee's eyes, wings, antennae, hair, sting and more. Bee aims to inspire surprise, curiosity and awe through the unique perspective provided by scanning electron microscopy, melding art and science in these images. When our frame of reference is shifted, the interplay of observation and imagination can inspire new ideas, connections and applications. People are generally very surprised by these images, and actually stop to look and consider them. Children, who often love insects, are fascinated by seeing what a bee looks like very close up. This is therefore surprisingly a family book, as well as a book for photographers, artists, designers, gardeners, environmentalists, engineers, architects, those interested in bio design and bio mimicry. From the author: I believe that by seeing what exists in the micro world we may become more sensitised, mindful and caring about our familiar daily realm. My hope is that Bee will stimulate greater appreciation for the bees, more interest in learning about bees and learning from them too. We easily lose sight of our dependence...

Reviews

This is the finest book I have got study till now. It usually does not price a lot of. I found out this publication from my i and dad encouraged this book to understand.

-- **Jamil Collins**

Absolutely among the best book I have possibly go through. I have go through and that i am certain that i am going to gonna read through once again again in the future. I am just delighted to tell you that this is basically the finest book i have got go through within my personal existence and could be the finest book for ever.
