By Marine Biological Laboratory

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 132 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 edition. Excerpt: . . . of a number of nymphs, collected at the same time and place near the Kansas University campus, nine were taken at random. These were probably of the same age, for they were of approximately equal size, ranging from 12 to 14 mm. in length. 4 Older Nymphs. -- Two of them, one 26 mm. long, wing stubs 6 mm. ; the other 33 mm. long, wing stubs 9 mm. Both were collected by W. R. B. Robertson in Dickinson Co. , Kansas. Adults. --Two were furnished by Mr. Robertson from the locality mentioned above. Three were furnished by the Kansas University Zoology Department, two of them being *S. americana* and the other *S. alutacea*. The average measurement of dried adult specimens was 44 mm. exclusive of wings. All material was fixed with Flemming and stained with Heidenhains iron hematoxylin. III. Observations. 1. Comparison of Chromosomes....

### Reviews

*This pdf may be worth purchasing. This is for anyone who statte there was not a really worth reading. I found out this pdf from my i and dad encouraged this pdf to understand.*

-- **Mrs. Annamae Raynor**

*If you need to adding benefit, a must buy book. This really is for all who statte that there had not been a well worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Claud Bernhard**
