STEEL TABLES WITH PLASTIC MODULUS OF I.S. SECTIONS (SECOND EDITION)

[DOWNLOAD](#)

I.K. International Publishing House Pvt. Ltd., 2014. Paperback. Book Condition: New. 18cm x 24cm. Though determining plastic modulus of section assuming the section to consist of rectangular parts are within the reach of a design engineer, but as Indian Rolled Steel Sections consist of sloping flanges, fillets at junctions and rounded edges are slightly complex. The authors have considered all the complexities in the shapes of Rolled Steel Sections and have determined Plastic Modulus of Steel Sections for I-beams, Channels, Tee-sections, Equal and Unequal Angle sections, I-beams with cover plates on both flanges and I-beams with Channel section on the upper compression flange (for Gantry Girders). Besides this buckling class of the sections in bending and axial compression are also provided. Useful information about properties of Indian Standard straps, strips and sheets are tabulated for ready reference for design engineers. The book also provides ready references of shear strength and tensile strength of Grade M4.6 bolts of different sizes and minimum end distances and pitches in their connections. Fillet weld strength per mm length are also given. In the present 2nd edition, missing headlines to a few columns are added and a figure is corrected. A column is added to tables so that the user can get the values of h_1 as well as h_2 straightaway. With minor corrections and additions the tables are made more user friendly. At the end important formulae to be used in Working Stress Method and Limit State Method are provided.
