Brand New Book ***** Print on Demand *****.Excerpt from Stevenson s Introductory Bookkeeping: Text-Book on Accounting, for Public Schools, Academies, Normal Schools, and Teachers Institutes This book is the result of years of teaching, and is fresh from the class-room. It is based upon the idea that the student should be taught to be a thinking, acting being, rather than an automaton, performing certain processes by rule. As a branch of mathematics, bookkeeping should train the reasoning powers, and be productive of acuteness, method, accuracy, and speed. As a department of political economy, bookkeeping should direct the thought of the pupil to those great human activities in trade, commerce and accumulation which are such important elements in the happiness and well-being of the world. Mathematics is generally regarded as an abstruse and theoretical subject, yet it is applied in all the business activities of life. Too often men of high scholastic attainments discover that they lack the first principles of business success. They have given no attention to business customs and usages, and are helpless in their business affairs. Bookkeeping combines much of business...
