Many believe that the idea that God created the world cannot coexist with that of Darwin's evolutionary theory. And with that mind-set comes the conviction that Christianity itself hasn't changed a evolved a over time. But would this be such a bad thing? In The Big Bang, Dinosaurs, and Jesus: Essays on the Evolution of Christianity, author Currin Carter answers this question and many others as he argues with himself and seeks to enlighten Christians on the origins of their religion and how it evolved into today's many denominations. He will also ask such questions as: Why did the Israelites consider blood sacrifice necessary? What is the proper balance of government and free enterprise? Why is the God of the Old Testament seemingly so different from the God of the new? What does it mean to truly worship one God? Some questions will be answered, but he also simply addresses issues, letting you answer the ultimate question: what do you believe? And why?.
